## Contents

Preface vii  
Acknowledgements x  

1 **Food and beverage operations and management** 1  
   1.1 Food and beverage operations 2  
   1.2 Service operations management 5  
   1.3 The hospitality industry and its products 9  
   1.4 Key influences on the food service industry 18  
   1.5 The legal framework 23  

2 **Concept development** 27  
   2.1 Developing a consumer–product relationship 28  
   2.2 Market research 31  
   2.3 Market segmentation 33  
   2.4 Idea evaluation 37  
   2.5 Completing the concept development 38  
   2.6 Setting goals and objectives 40  

3 **Product development** 44  
   3.1 The food and beverage product 45  
   3.2 Quality in the management of food and beverage operations 54  
   3.3 Creating the consumer–product relationship 62  
   3.4 Sales promotion 69  
   3.5 The consumer–product relationship as a dynamic process 77  

4 **Operational areas, equipment and staffing** 79  
   4.1 Key influences 79  
   4.2 A systematic approach 81  
   4.3 Health and safety 85  
   4.4 Food production areas and equipment 91  
   4.5 Food and beverage service areas and equipment 96  
   4.6 Staff management considerations 106
5  Food production
   5.1  Cuisine and restaurant styles
   5.2  Types of menus
   5.2  Menu planning
   5.5  Volume in food production
   5.5  Purchasing
   5.6  Operational control

6  Beverage provision
   6.1  Safe, sensible drinking
   6.2  Types of wine and drink lists
   6.3  Developing wine and drink lists
   6.5  Purchasing
   6.6  Further consideration on wine provision
   6.7  Storage and beverage control
   6.8  Beverage control

7  Food and beverage service
   7.1  The nature of food and beverage service
   7.2  Food and beverage service systems
   7.3  Customer service vs resource productivity
   7.4  Customer relations
   7.5  Managing volume
   7.6  Managing the service sequence
   7.7  Revenue control

8  Events, conferencing and banqueting
   8.1  Overview and structure of the events sector
   8.2  Sales and marketing
   8.3  Staffing considerations
   8.4  Managing the event process

9  Appraising performance
   9.1  Approaches to appraisal
   9.2  Appraising revenue
   9.3  Appraising costs
   9.4  Appraising profits
   9.5  Appraising the product
10 Making strategic decisions

10.1 The origins of strategy

10.2 Assessing current performance

10.3 Assessing organisational capability

10.4 Strategic analysis and planning

10.5 The need for a balanced approach

10.6 The basis of strategy

10.7 Strategic direction

10.8 Strategic means

10.9 Evaluation criteria

Appendices

A: Performance measures

B: Calculations exercise

C: Exercise on budget and trading results, comparison and evaluation

Augmented bibliography

Index
Food and restaurant styles are continually changing to meet the challenges of the demands being made by increasingly diversified, knowledgeable and value conscious customers. These demands, together with the staggering developments in food technology, kitchen and production methods, the application of operations management techniques, and a greater understanding of the use of architectural and interior design, have created new possibilities and alternatives.

Expansion of the industry has generally meant greater choice. This, together with potential skill shortages and drives for efficiency, has seen a streamlining of food and beverage operations. Increasing competition has also meant the quality of the service and the perceived value of the experience by customers are now the main differentiators between those operations that are endeavouring to attract similar customers.

It is against this background that this book has been revised.

Content

The content of this book reflects current industrial practices. It provides information and viewpoints on a variety of aspects of food and beverage management and considers various approaches, which students and food and beverage practitioners will find useful. The book will also be of value to those in the hospitality, tourism and events industries who are responsible for purchasing food and beverage services.

Aims

The principal aims of the book are to:

- provide supporting information for those involved, or likely to be involved, at a variety of levels, in food and beverage management;
- meet the needs of students and practitioners who want to acquire underpinning knowledge and skills in order for them to achieve competence in the industry;
- meet the needs of students studying for a range of qualifications, including City and Guilds, BTEC, Institute of Hospitality and foundation and undergraduate degrees;
- provide support for in-company training programmes, and
- provide a foundation on which to build further knowledge and skills.
The book covers aspects of the management of food and beverage (or food service) operations that are applicable to a wide variety of industrial sectors. We have assumed that those using this text will have already acquired knowledge and skills in food and beverage operations.

**Structure**

The structure of the book has been based on an adaptation of the food service cycle. Thus the user is led from the consideration of food and beverage operations in Chapter 1, to concentrating on developing the relationship between the consumer and the food and beverage product in Chapters 2 and 3. Chapter 4 covers operational areas, equipment and staffing considerations before moving on to food production in Chapter 5, beverage provision in Chapter 6, and food and beverage service in Chapter 7. Chapter 8 considers events management in more detail and the book culminates with performance appraisal in Chapter 9 and strategic decision making in Chapter 10.

**Using the book**

The book can be approached in two main ways: either by working through the various chapters in the order they are presented, or by selecting what parts of the book are relevant to a particular learning programme or job. The structure of the book is outlined in Figure 1.2, which is on page 4. The structure identifies the relationship between the chapters of the book and it can also be used to identify what parts of the book might be relevant at the time

Whatever approach is adopted it is recommended that all of Chapter 1 should be covered first, as this Chapter essentially lays the foundations for the rest of the text. It also places the consideration of food and beverage (or food service) operations and management within context.

**Learning support**

Learning is supported through the provision of an aim and identification of objectives for each of the chapters. These objectives indicate the learning outcomes that may be achieved. These outcomes can be mapped against the learning outcome requirements of different education programmes, or in-company training courses. Also included within the text are examples of a range of learning activities.
Three appendices are provided, which detail particular approaches: Appendix A contains a listing and explanation of operational and other financial ratios; Appendix B provides an operational calculations exercise, and Appendix C sets out an exercise on trading results comparison and evaluation.

Teaching and learning are also supported through the provision of PowerPoint presentations, which are available from the publisher’s website at: http://www.goodfellowpublishers.com.

Focus

The main focus of the material is directly relevant to the management of food and beverage operations. Business management areas such as marketing, personnel and finance are already supported by a wide range of well-established resources. Although some applications of these are covered within the book, references are given to other information sources and further reading.

Overall

Our view remains that successful food service operations are those that have a clear understanding of their customers’ needs, which they continually seek to meet.

*February 2016*
We would like to express our grateful thanks to all the individual and organisations and who gave us assistance and support in developing this text, and especially those who have provided feedback on the previous editions.

In particular we would like to thank:

- Academy of Food and Wine Service, UK; Foodservice Consultants Society International, UK&I; Croner’s Catering, Croner Publications, London;
- Andrew Durkan, independent food and wine consultant; Food Service and Executive Management Teams, University College Birmingham;
- Cailein Gillespie, formally lecturer in Management at Strathclyde University, Glasgow;
- Robert Hayward, Senior Lecturer, Service Sector Management, Sheffield Hallam University;
- Hotel F&B magazine, H2O Publishing;
- Institute of Hospitality;
- IFS Publications, Bedford;
- Katie Kyrousis, Food and Beverage Services Training Manager, Gleneagles Hotel, Scotland;
- Dennis Lillicrap, consultant, author and trainer in food and beverage service;
- The Restaurant Association of Great Britain;
- Fiona Patterson, Food and Beverage Manager, Hotel LaTour, Birmingham;
- Carole Rodger, Principal, Lecturer, Leeds Beckett University;
- Royal Academy of Culinary Arts;
- Suzanne Weekes, Director of the Academy of Food and Wine Service;
- and Ian Whitaker, Managing Director, Cawdor Castle, Scotland. A special thank you also goes to Andrew Pennington who had contributed to the third edition.
